

# Introducing Precision 10-60

The first UK Built Sample & Blanket machine in 20 years

This is the new generation of blanket and sample cutting machine.

This plotter utilizes the latest version of windows computers, including a 22" touch screen making it very user friendly and cost effective.

It eliminates the need for expensive controllers.

We have developed a new way of clamping the blanket giving perfect registration every time.

We have also developed what we call 'perfect corner technology' this eliminates the snags left behind with the old cutters, giving a really clean cut finish

For the optimum strip time.

This machine can be turned from a blanket cutter to a sample maker in under 30 seconds,  
Leaving the old machines in the past. What once took 30 minutes, now takes seconds.

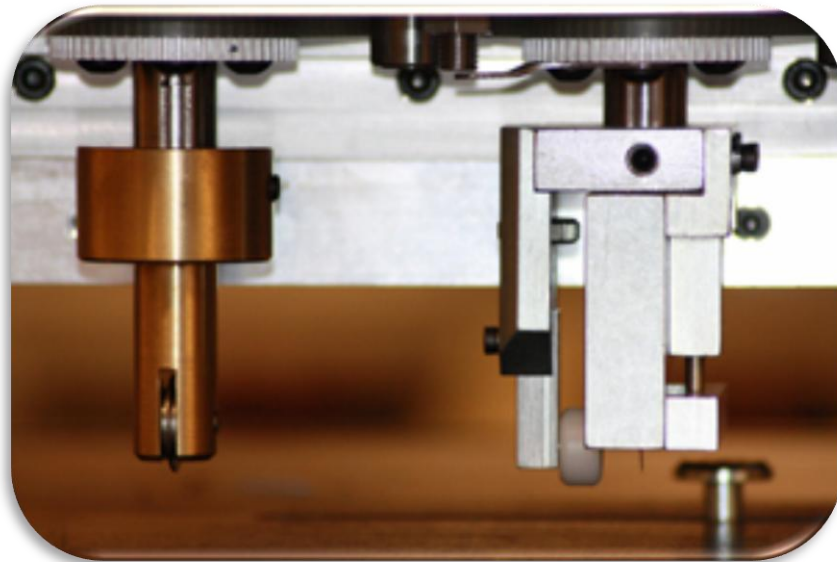

The Precision takes a maximum board size of 1200mm (48") x 815mm (32").

Compressed air requirements - 85PSI (6bar)

Well-established and proven technology.

All models are robust workhorses.

Simple yet comprehensive software drives all our machines.

Each model comes with a 12 month or more UNLIMITED\* warranty.

Exceptional support and service back-up

Many satisfied users world-wide

Low cost consumables.

Fully UK made and all parts are UK based

\* By UNLIMITED we mean that there is no limit on the number of mats that can be cut during the

Warranty period. That is how confident we are about the quality of our machines. But UNLIMITED

Does not include consumables or misuse of the machine.
